A 2025 Memorandum to the State of Israel concerning the influence of Mars on regional security, militant rocket fire and antisemitic attacks. Also, an advisory that a full military mobilization along the entire border of Israel is deployed in early June of 2025, regardless of the geopolitical circumstances. Between June and September of 2025, a major attack against Israel will occur

This is an urgent memorandum that is not being written out of the blue. In fact, many who are familiar with my work are aware of my continued ability to forecast and warn of the timing of major rocket attacks against Israel, particulary from Gaza. Here are links to previous memorandums written to the state of Israel

2022: https://www.academia.edu/84269196/A_Memorandum_to_the_State_of_Israel

2023: https://www.academia.edu/105190238/A_2023_Memorandum_to_the_State_of_Israel

2024: https://www.academia.edu/117242598/A_2024_Memorandum_to_the_State_of_Israel

For five consecutive years, Gaza militants have fired its highest concentration of rockets at Israel, relative to the year, within the same planetary configuration of Mars being within 30 degrees of the lunar node. This held true, even on October 7th 2023 and thereafter in 2024, and will be the case in 2025.

At a probability rate of 100%, the month with the highest concentration of rocket fire from Gaza within the calendar year since 2005, is the month during which Mars is within 30 degrees of the lunar node. Since 2019, via youtube, social media, and academic papers in the form of memorandums, I have accurately predicted and assessed based on that very data, when Israel should have expected escalation to occur. Some of this information was sent to Israeli officials. Here is the data. The month with the asterisk indicates month with highest rocket total compared to other months of the year. Every single year, that month coincided with Mars within 30 degrees of the lunar node.

These stats pertain only to militants in Gaza and all rocket fire from Gaza into Israel since 2005

There is a pattern in which the highest concentration of rocket fire against Israel within a calendar year is occurring when Mars is within 30 degrees of the lunar node. This is happening at a rate of 70% since 2005.

In every single year since 2005, the month containing the highest rocket fire for the year is a month in which Mars had been within 30 degrees of the lunar node at some point.

May 01 2019-Jul 29 2019
Jan 15, 2020 - Apr 3rd 2020

Below are future dates of Mars within 30 degrees of the lunar node

Feb 9, 2021 - May 13, 2021
Nov 4, 2021 - Jan 22, 2022
June 22, 2022 - Sept 19, 2022
Dec 26 2022 - Jan 24, 2023

Aug 24, 2023 - Nov 15, 2023
April 12, 2024 - June 25, 2024
June 5, 2025 - Sept 4, 2025
Feb 4, 2026 - April 19, 2026
Sept. 27, 2026 - June 12, 2027

In 2024, we saw other actors get involved in rocket attacks. While Hezbollah's major escalation against Israel occurred outside of Mars being within 30 degrees of the lunar node later in the year, Iran and other actors, however, launched their major escalation against Israel while Mars was within 30 degrees of the lunar node between April 13th and June 25th 2024. On April 14th 2024, Iran launched its first major assault against a soverign power, firing 350 projectiles at Israel in the form of drones and rockets in what would be the largest drone attack ever carried out against a nation state. Even the Iran missile attack later that year against Israel did not exceed the number of projectiles of the first attack in April. Thus, we can gather that Iran is on the same attack timeline as Hamas and other Gaza militants and should be expected to commence Operation True Promise III between June 5th 2025 and September 4th 2025, with a target date around July 23rd, 2025 which is when Mars will be very close to the lunar node. Gaza militants will demonstrate a show of force during this time as well, continuing with the same pattern of escalated rocket fire coinciding with Mars being within 30 degrees of the lunar node. Overall, expect the highest concentration of missile attacks against Israel during the year of 2025 to occur while Mars is within 30 degrees of the lunar node between June 5th 2025 and September 4th 2025.

Mars influence in this regard, while largely concentrated towards Israel, does expand to the rest of the world in the form of antisemitic inspired attacks. Synagogues around the world shoud be on high alert for this reason. It is warned that Israel's main ally will be afflicted by Mars being within 30 degrees of the lunar node as well and thus will not be able to respond to the major assault of 2025 that will lead to the loss of Israeli territory for the first time in its history.

When it comes to Israel, Mars serves as a celestial warning that is implicated as a longstanding enemy of Israel and harbinger of terror, serving as the dwelling place for all the gods of war that have operated throughout history. Even the Romans used Mars to sack the Jewish temple in 70AD. The Talmud associates Mars with Samael, the archenemy of the Jewish people. Here is data that links Mars to the most significant periods in history, among which are attacks carried out in the name of antisemitism.
